

Field study: garden water use

A small garden compared two irrigation schedules over three days.

1. Recorded water use

Day	Drip (L)	Sprinkler (L)
Monday	12	18
Tuesday	10	17
Wednesday	11	19
Total	33	54

The drip schedule used 33 L in total.

The sprinkler schedule used 54 L.

2. Observations

Soil moisture was checked each morning before watering.

The comparison describes this garden only;
it is not a general recommendation.

3. Follow-up

Repeat over a full week and record rainfall.
